Para Medic 8 yrs. - Allied Amb.
5/24/95 Thurs - responded to call Park & Mac with
from Heyland.

- Arrived on scene - 1 Amb crew was there
- My partner [redacted] - went to Cardiac
lady in other car.

- I went to assist Subaru, white wagon
four men were trying to execute female driver
went to passenger - white male;
I asked him his name, age, What happened
where you hurt?

he said - Cherney - spelled it, "This was an
assassination attempt, they've been trying to
kill us for a long time." Air bomb, bomb exploded.
he - "How's Judi Bari, How's Judi, Is she OK."

She's a godsend, As you know she's an
environmental activist, We're with Earth
first.

repeated couple of times "This is an ~~assassination~~
attempt - they're trying to kill us.
Cherney - knew he was in OAK, his age and
seemed oriented to the event"

When I arrived, [redacted] Paramedic
was at passenger car & Cherney had a trauma
dressing to left eye.

I stood Cherney up & turned him & he sat him on gurney
in back of ambulance.

Cherney was talking all the time - Video was on a TV?
It struck me ~~was~~ that Cherney ^{said} that a bomb exploded

2.

Cherney did not have to ask what happened at all
at the time, I didn't know what the cause of
the accident was.

Cherney, in Ambulova talked of his relationship
w/ Ban: "She was my girlfriend. We just
freaked out. I'm trying to work things out"
"God Bless her"

his injuries were: left temporal laceration 1 1/2"
left eye irritation - swelling
left calf abrasions
scratched marks on left arm & side

when Cherney first approached the Subamey, saw
~~family but not~~ male passenger who
wearing Army fatigue pants & tank t shirt
Cherney spoke about his group - tree spikes,
something in Santa Cruz

- Cherney's demeanor was completely unusual.

he spoke loud & as if to divert a draw
attention to himself & group - not conversational tone
Cherney was extremely distrustful of assurances
that the driver was alright.

"If they" didn't kill us. They tried to run her down
focus of his comments was on her & her standing in the
organization, rather than what happened.

Didn't meet any

Agent ;

Attached is the flyer, I described over the telephone. It was located at the Arcata Co-Op Market (811 I St., Arcata), on Monday, August 27, 1990 by Officer  was conducting regular foot patrol at the time. The radical nature of the flyer prompted him to collect it and bring it to my attention. This is the only copy of this particular flyer to have been located. Efforts to locate others are being made.

I have located only one similar type style. This is on the flyer I've attached. I don't recall exactly when or where we obtained this one.

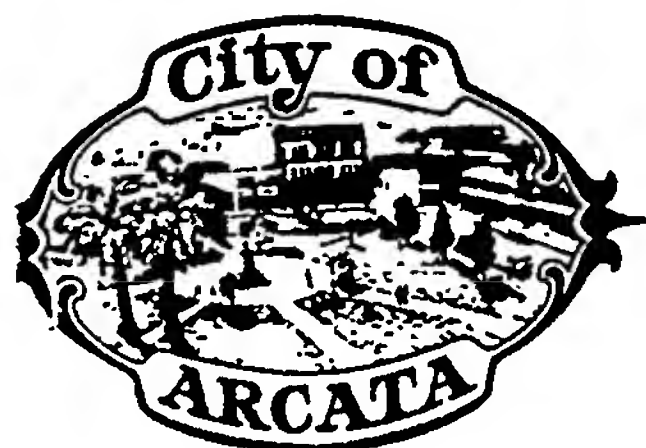

If I may be of any other assistance, please feel free to contact me. I will forward any other pertinent information.

Results of examination

It could not be determined whether the questioned writing appearing on specimens Qc449 through Qc454 were all prepared by the same writer because of variations in printing style as well as the hand drawn nature of the questioned writing.

The submitted specimens have been photographed and are being returned as enclosures with this report.

printed message beginning "TREES SPIKED ON ..."

Results of examination

Some similarities were observed in printing style when comparing the writing appearing on specimen Qc448 with the questioned writing on the Q2 cardboard (00601001 S/D YR WW). However, because of the hand drawn nature of the the questioned writing, it could not be determined whether both entries were prepared by the same writer.

Indented writing in the same printing style was observed on specimen Qc448 which reads:

"THE UNION NEWSPAPER
613 H STREET
ARCATA, CA 95521"

Photographs have been made and are retained.

Specimen Qc448 will be returned with the results of the latent fingerprint examination.

Results of examination:

It was concluded that the typewriter used in the preparation of specimens Q16 through Q19 previously submitted (Laboratory number 00601002 D WW) was not used to prepare any of the typewriting appearing on specimens Q367 through Qc378.

The typewriting depicted in specimens Qc368 and Qc369 is a Pica style of type with a horizontal spacing of 10 characters per inch. The typewriting appearing on specimen Q375 is a Courier style of type with a horizontal spacing of 10 characters per inch. The typewriting appearing on specimen Q376 is a different Pica style of type with a horizontal spacing of 10 characters per inch.

The printed text appearing on specimens Q367, Q371, Q372, Q374 and depicted in the Qc373 photocopy were prepared on dot matrix printers. Because of the lack of individual identifying characteristics, it could not be determined whether any of these specimens were prepared on the same printer.

Specimens Qc370, Qc377 and Qc378 are photocopies; therefore, due to the lack of individual identifying characteristics it could not be determined whether these specimens were prepared on the same laser printer or typewriter.

The submitted items have been photographed and will be returned with the results of the latent fingerprint examination.

Results of examination:

The typewriting appearing on specimens Q16 through Q19 is a Pica style of type with a horizontal spacing of 10 characters per inch. This style of type is found on Royal typewriters and possibly other brands. The typewriter used to prepare Q16 through Q19 was a typebar machine equipped with a fabric ribbon. Additionally, a number of distinctive characteristics were observed indicating the questioned typewriting may be identifiable with the typewriter used in their preparation.

The specimen Q16 envelope bears some distinctive manufacturing characteristics by which it can be compared with suspect envelope sources.

The 25 cent Jack London U. S. postage stamp on Q16 was removed from a booklet of stamps.

"Stuart Hall Kleenerase ERASABLE BOND" watermarks were observed on specimens Q17 through Q19. This watermark appears on paper manufactured by Stuart Hall Co., Inc., P. O. Box 1381, 2121 Central St., Kansas City, MO 64141, telephone number 816-221-8480.

The submitted specimens were searched in the appropriate sections of the Anonymous Letter File without associating them with specimens submitted in other cases. Representative copies have been added to the file for future reference.

No indented writing or other observable physical characteristics were observed which would aid in identifying the immediate source of the submitted specimens.

Specimens Q16 through Q19 have been photographed and will be returned with the results of the requested latent fingerprint examination.
